Depos On Demand (DOD) released
Software program offers electronic transcript delivery after instant payment

Houston, TX, March 22, 2010 - Reporting Solutions, Inc. announces the latest, revolutionary electronic delivery and payment service for the court reporting industry through its newest product, Depos On Demand (DOD). Depos On Demand (DOD) facilitates the exchange of the electronic transcript and/or exhibits for instant payment. This new offering allows reporters or firms to upload rough or final transcripts with or without exhibits, of any file format (PDF, ASCII, E-tran, etc.), assign a dollar value and send a notification with a link to available file(s) to the attorney. Once payment is processed through PayPal or Google, the file(s) can be downloaded immediately. The funds received from the attorney are instantly and automatically deposited into reporter/firm's bank account.

Frustrated with the time and expenses wasted on collection efforts and would like to increase cash flow? Just DOD it. Have a rush electronic transcript and concerned about potential payment problems? Just DOD it. Tired of the hassles and the costs related to refused/returned COD deliveries? Just DOD it. Need the ability to occasionally accept credit/debit card but cannot justify the monthly, fixed expense associated with a merchant account? Just DOD it. Getting requests for "electronic only" where traditional COD won't work? Find coordinating check payment labor intensive and time consuming? Just DOD it.
