***pdf-it 4.5 released***  
**Software program offers electronic transcript creation, delivery and payment**

Montgomery, TX, September 15, 2010 - Reporting Solutions, Inc. announces the latest improvements to *pdf-it*. eLINK now provides automatic viewing on iPhones, iPads, and BlackBerries. No special applications or viewers are needed to download and install. This new feature allows attorneys and paralegals the ability to “work on the go.”

eLINK is a free *pdf-it* tool that delivers transcripts and exhibits via the internet. Reporting Solutions’ *pdf-it 4.5* allows for automatic viewing of transcripts, word indexes, and exhibits on mobile devices such as iPhones, iPads, and BlackBerry phones. When your clients click on the eLINK sent to them by your office, the *pdf-it* download page automatically detects the accessing device and customizes the viewing experience for maximum productivity.

Depos On Demand (DOD) now provides the ability to accept debit/credit card payments for invoices. Simply upload any file requiring payment including transcripts, exhibits, and invoices, send a link to attorney/paralegal and receive instant payment. Since payments go straight to your bank account you have immediate access to the funds. With the current economic conditions, Depos On Demand (DOD) can alleviate the problems and stress of delivery to out-of-state attorneys and law firms who are not credit worthy. Best of all, it is completely free to *pdf-it* customers.

*pdf-it* is the complete solution to create, deliver and receive payment for transcripts and exhibits.

Prices start at \$30.00 per month. Please contact us to start your free 30-day trial.
