***pdf-it* 4.6 released** **Software program offers electronic transcript creation, delivery and payment**

Montgomery, TX, November 19, 2010 - Reporting Solutions, Inc. announces the latest improvements to ***pdf-it*** and has many more planned for 2011.

eLINK now has its own 60-day history screen. With a built-in search feature, finding and resending an eLINK couldn't be easier. ***pdf-it***'s eLINK tool allows our clients to offer transcripts and exhibits that can be viewed on mobile devices such as iPhones, iPads, and BlackBerry phones.

pdf-it 4.6 expands and automates billing options for our client's convenience. We now offer two flexible monthly billing options: "30-day pass" and "Month-to-Month". The 30-day pass enables users to purchase thirty days of service with no further commitments. The Month-to-Month option may be a better fit for busy reporters and firms. This billing plan will automatically bill the credit/debit card at the first of each month via PayPal, and can be cancelled ANYTIME. Of course, our per ***pdf-it*** and yearly options remain available.

We have a list of enhancements set to be released in 2011. We are most excited about our Electronic Read and Sign, or "eR&S", with an optional "Buy Now". This service is guaranteed to save time, paper, and postage costs. Production staff will be able to simply send an eLINK to a Read Only electronic transcript with a Changes and Signature Pages Only print option. The eR&S transcript link will only be valid during the designated days (i.e., 20 or 30). An optional "Buy Now" button, enticing recipients to immediately purchase the transcript, can provide an effortless way to boost sales.

pdf-it is the complete solution to create, deliver and receive payment for transcripts and exhibits.

Prices start at \$30.00 per month. Please contact us to start your free 30-day trial.
